## Devolution!

→ People keep asking how do we put it back together if the government goes to devolution!! The premise is as thought this could be (devolution) a bad thing. How could the elimination of evil doers, mis leading, corruption, stealing, dishonest politicians, dishonest corporate leaders, dishonest entertainers, powerful and terribly oversized and controlling government and its extensions ... be bad. This oversized of everything and the control they have over the people upon earth was created and run by the evil doers and not the intention when human development entered a growth phase. People organize to better themselves and to help others as they see fit. People are not to be

controlled and forced into restrictive limitations. As you are now fully experiencing. You... each one of you are to be conducting your lives so you learn all the things you want to learn and experience in your current lifetime. No to be controlled to do what others want you to do. You are to live a life of freedom to do the things that bring joy to you, that bring happiness to you and others, You are to live a life that does harm to no one! This life of freedom and joy and happiness is a promise the establishment controls leads you to believe. For many they wait and wait, as designed by the evil doers, which leads to disintegration of personal growth, personal will, & the pursuit pursuit of happiness

it degrades the natural expansion of your soul development. The promise the establishment controls lead you to believe that they are the ones who give you these things. They make you believe these falsehoods and leads you to destruction and disintegration of the will. This is their plan. This was not your plan.

Devolution means. Get rid of all the oversized government controls. Get rid of all the oversized corporate and entertainment controls. Get rid of all the evildoers that have de-railed your life of happiness, of joy and of balance. Once all those are broken down and eliminated... All humans of every land will then create how they want to live their lives. How they want the community to live together as

individuals. How the necessary grouping of governance is made to help and assist the people ~~and~~ - not create joy, happiness: wealth for just themselves feeding off the people - And is made to be minimal in the size of government. Minimal... Small... but effective.

You the person is to be the focus. To live and learn in freedom, in joy and in the pursuit of all you desire to achieve and happiness doing no harm to any one.

Embrace Revolution for your own good. Let it break down even though it will be difficult living, functioning during this breakdown. You must have faith in yourself. This is your opportunity to correct all

the wrong perpetrated on to you  
by the evil doers. This is your  
lands. This is your living. This  
is your way to create all that  
living upon the earthly realm  
has for you. Removed from the shackles  
that you are being held by. You are  
to live ... love ... and Prosper.

Embrace Devolution for your own good!
